📍 Pune

SUMMARY

I'm a React developer and like creating good-looking and well-performing websites. I also know how to make use of tools such as React.js, JavaScript, HTML, CSS, and Tailwind for making responsive and interactive web applications. I have also done some work with APIs, Git, and some backend technologies using Node.js, MongoDB, and MySQL. I enjoy having clean and well-organised code, and I'm constantly learning to improve. I look forward to being part of a team where I can learn and assist in creating amazing user experiences.
